

Experiment: Property Buying and Rental System using Zoho Creator (SaaS)

Aim

To design and develop a Property Buying and Rental System using Zoho Creator, a cloud-based SaaS platform, that enables users to register property details, calculate the total property cost or rental amount, and maintain property records efficiently.

Procedure

Step 1:

Log in to Zoho Creator.

Step 2:

Click Create New Application.

Step 3:

Enter the application name as: Property Buying and Rental System

Step 4:

Create a form named: Property Details

Step 5:

Add the following fields:

Field Name	Field Type
Customer Name	Name
Phone Number	Phone
Property Name	Single Line
Property Type	Drop Down
Location	Single Line

Cost	Currency
Number of Months	Number
Total Amount	Currency

Step 6:

Create a workflow to calculate the total amount.

```
if(input.COST != null && input.NUMBER_OF_MONTHS != null)
{
    input.TOTAL_AMOUNT = input.COST *
    input.NUMBER_OF_MONTHS;
}
```

Step 7:

Create an **On Success** workflow to display a confirmation message. "alert "🏠
Property Booking Successful!\nThank you for choosing our service."";

Step 8:

Create a report named: Property Report to display all property booking records.

Step 9:

Run the application, enter property details, submit the form, and verify that the total amount is calculated automatically and the confirmation message is displayed.

BOOKING ID	CUSTOMER NAME	PHONE NUMBER	EMAIL	PROPERTY TYPE	PROPERTY NAME	LOCATION
4	YOGAPRIYA	+917892563140	yogapriyakoodalingam07@gmail.com	APARTMENT	GREEN VALLEY	NEAR HOUSING BOARD
3	YAKSHINI E	+918807506895	yakshini18@gmail.com	VILLA	JASMITHA VILLA	NEAR HOUSING BOARD CHENNAI
2	JASMITHA	+917894561230	jashmithas05@gmail.com	COMMERCIAL	jash	chennai

Implementation

The Property Buying and Rental System was implemented using Zoho Creator forms, workflows, and reports. The system allows users to enter customer information, property details, location, property cost, and rental duration. The total amount is automatically calculated based on the property cost and number of rental months using a workflow. After the property booking is successfully completed, a confirmation message is displayed to the user. All property booking details are securely stored in the Zoho Creator cloud database, and reports are generated to manage property records efficiently.
